

Critical Information Summary: IP Line Business Broadband Internet

Information About The Service

IP Line Business Broadband Internet

Bundling Requirements

We do not require that you bundle this service with any other service.

Minimum Term

Minimum commitment term is 36 months.
Cancellation of order prior to deliver will incur \$1099 charge

Availability and Qualification

IP Line is not available everywhere. Availability depends on a number of factors including whether the necessary equipment is available at the relevant exchange, the length of the cable to the nearest exchange and the quality of the existing copper pairs that the service runs over.

You need available copper lines in order to get IP Line, but the line must not be active and in use as a PSTN telephone service. In some cases you may not have enough copper lines at your location for the service to work.

What's Included and Excluded

Your SHDSL service includes:

- Static IP Address

You receive an **Unlimited Data Allowance** each month. There are no peak or off peak restriction on your use and no excess usage charges.

You may change your plan once per month. There is no charge to upgrade your access speed (i.e. 2Mbps to 4Mbps) however there is a charge to downgrade your access speed (i.e. 4Mbps to 2Mbps) of **\$357.50**.

Ethernet Speeds

- Actual speeds you will receive will vary due to a number of factors such as your distance from the exchange, the network connecting the exchange, your equipment, software and internet traffic.
- Download speeds on devices connected via a Wi-Fi modem or network extender may be slower than on devices connected by a fixed Ethernet cable.

Equipment

You may use your own router provided it is compatible with our service, however this means that you will be responsible for the configuration and management of the router. Ask us for information on approved routers. Alternatively you may purchase your router from us. If you do purchase a router from us we will support, monitor and manage the router on your behalf. We recommend Cyberoam or DrayTek routers.
